Articles and partner pages

P26 Consultancy is an AI and technology studio based in Vadodara, India. It works with CXOs, leadership teams and founders in three ways: consulting on where AI and technology will pay off, building custom software, SaaS and AI workflows, and launching ready-made products for specific industries. Every recommendation is tied to a number the business already tracks, and every build ships working software in short, demoed sprints. Led by founder Abhishek Jain, P26 has shipped 50+ products for clients in 5+ countries, with client partnerships running seven years and more. Learn more at p26.co.

Profiles and long-form features

P26 Consultancy is an AI and technology studio based in Vadodara, India, incorporated in 2024. It helps growing businesses get measurable results from AI and software, working with CXOs, leadership teams and founders, including non-technical founders who need a technology partner. P26 works in three ways. Consulting helps leadership teams decide where AI and technology will pay off before they commit budget, through strategy work, workshops and fractional CTO engagements billed in prepaid hour blocks. Build delivers custom software, SaaS products and AI workflows through a dedicated team billed monthly, or a fixed-price MVP, with working software demoed every sprint. Products are ready-made software for specific industries, including websites with a built-in CRM, booking systems and AI workflows, priced in rupees in India and dollars elsewhere. The studio is led by founder and principal consultant Abhishek Jain, who stays on every engagement from the first call to launch. P26 has shipped 50+ software products for clients in 5+ countries, and its longest client partnership has run for more than seven years. Its approach is simple: find where technology moves a number the business already tracks, ship the smallest thing that moves it, then measure, improve and scale what works. Learn more at p26.co.

FOUNDER

Abhishek Jain

Founder and Principal Consultant, P26 Consultancy

Abhishek Jain is the founder and principal consultant of P26 Consultancy. He works with leadership teams and founders to decide where AI and technology will pay off, then leads the teams that build it. He has led the design and delivery of 50+ software products for clients in 5+ countries, and stays on every P26 engagement from the first call to launch. He is based in Vadodara, India.
